## Short description

I am currently working as a hairdresser. Already at the beginning of my job I realised that creative work is important to me and that I would like to further my education in the field of "make-up". Since it has always been my dream to work on the set, I would like to get closer to this wish through and my curiosity for new things. Thanks to my good knowledge of human nature and my open manner, it is easy for me to work with people. I learn quickly, which is why I succeed in implementing the desired requirements.
